Some Blooded Horses.

America has the fastest trotting horses in the world. But in the matter of draft and beavier carriage animals, we make, probably, the poorest showing of any country except Italy. Our farmers and breeders are waking up to this defect and rapidly remetying it. They cannot do it too soon. The keep of a poor horse is just as expensive as that of a superior ene. The inferior animal is a steady leas.

The most magnificent draft borses are beyond doubt the Clydesdales, from the valley of the Clyde, in Scotland. One of them will draw a load quite equal to that of two ordinary American draft horses. To the American eye they look as large as an elephant. They possest great beauty in spite of their size, and they are very docile and intelligent, having the large, soft eye of a woman. The Clydesdale horses are well known in Indiana and Illinois.

French horses appear at present to be the fancy in the United States. New York city has perhaps the finest draft horses in the country. The iron and safe men and the express companies have horses that are the look between its and Blackberries.

The best method for growing raspberries are the look between it will be of the country. The iron and safe men and the express companies have horses that are

she in the United States.

It has perhaps the finest draft horses in the country. The iron and safe men and the express companies have horses that are well worth seeing. Splendid grays and shining bays of great size and beauty are thining bays of great size and beauty are get about two feet high. If the grower waits until the cenes are four or five feet high, and then cuts off a foot or more, he checks and then cuts off a foot or more, he checks and then cuts off a foot or more, he checks are some of the best buds. Below is a picture of a beautiful gray the growth and loses some of the best buds.

description is the valley of Davos, in the Engadine, in Switzerland, where, at an elevation of 5,420 feet above sea level, the patients enjoy, during the winter months, in a sheltered position, brilliant sunshine and an early, equable sun temperature from sunrise to sunset.

The conditions prevailing at Davos, and producing the delightful climate of this winter resort, may be thus briefly summarized:

1. Great elevation above sea level. 2. A continuous, and, during winter, permanent covering of snow. 3. A minimum of watery vapor in the air. 4. A clear sun. 5. A clean atmosphere, free from zymotic germs, dust and fog. 6. A seeltered position, favorable for receiving both the direct and reflected solar rays. flected solar rays. I have been particular in describing these conditions in order to make clear the capa-bility of the Yellowstone plateau to provide

quiries made on the spot, I am of opinion that the Yellowstone National park possesses, in a high degree, all these essential conditions. In elevation above the sea it surpasses Davos; the great plateau of the park is between 7,000 and 8,000 feet above sea level, while it is stated that not one of the narrow valleys dips below 6,000 feet. The mountain ranges, partly surrounding and partly within the park, rise to heights of from 10,000 to 12,000 feet. I should anticipate, therefore, that all the advantages which, as a winter resort for invalids, Davos possesses from its elevated position, would be enjoyed even in a greater degree in the of red raspberries and shortens in the side branches early in the spring, thus se-Yellowstone park. The period of permanent snow is longer, so that invalids could remain there probably until the end of April, whereas the melting of the snow generally compels them to leave Davos early in March, when the climate of the valleys is peculiarly curing more and better fruit than if the entire canes were left on, and giving better opportunity for the pickers to move about unfavorable for chest complaints. It is to Liquid Manure for the Flower Garden, e expected, from its greater elevation, that Liquid manure has a wonderful effect upon a still clearer sky and a larger proportion of sunny days would be experienced in the

fore a shower. For tender flowering plants it must be weak. A tablespoonful of guano, to its comparatively greater freedom from or a small handful of fowl droppings, to a At present the park, so generously set apart by congress for the enjoyment of the American people, is utilized only by a very limited number of tourists, in the few months gallon of water will make it strong enough, of a very short summer, and it seems a pity Oats make hens poor, and often pack in their crops, and they die. They clog up the pipe leading from the crop to the gizard, cated during the winter months to the purand, when this is the case, the hens get no in The American Agriculturist says, "an hulls of the oats clog up the gizard and proper than active ones. The both by the rider and horse." Heavy horses the contents, and then sew it up.

world, restoring the only thousands of persons suffering from in cipient chest diseases, but also still greater numbers of the overworked populations of the contents.

Yellowstone park, while the wholesomeness of the air would be still more marked, owing

Pour one quart of vinegar over three quarts of raspberries, and let stand three Warfare. days. Strain them, and to each pint of juice add one pound of sugar, boil for ten minutes, skim closely, and bottle up. A While the use of the modern high explo-sives in military operations is still a problem, and is attended with many drawbacks, a few spoonfuls in a glass of cold spring or ice great future is before them. The very water make a most refreshing summer variety of these powerful agents already brought into use is suggestive. While dual-ine and dynamite, lithofracteur an I forcite, nitro-gelatine and tonite, and the whole array of the picrates and chlorates convey An Illinois firm is manufacturing a sheep The average wealth of Massachusetts farmers is said to be about \$2,529 per capita.

Jumbo was a 3-year-old New York state ram that produced 107 pounds and 3 ounces of wool at three clips. And yet he died of consumption.

array of the picrates and chierates convey to many persons only an indistinct idea of their differing properties, they all mark steps of progress in investigation. These are the mighty forces which have already been found invaluable to the quarry and to railway construction; and they are likely to effect as great changes in the military as in

Some years ago the Danish government established schools of butter making. Resuit: Danish butter commands the highest How Petroleum Pipes Are Cleaned. The pipes by which petroleum is trans-A writer in The London Garden says he knows of no better way of securing a heavy crop of peaches and nectarines than by putting a colony of bees with them when the trees are in bloom.

TORPID LIVER

by native women of strands often twelve and fifteen feet long, and fine ones are very expensive. It often takes two or three weeks to braid a single hat, which soils for \$5 or \$6, and lasts forever. A traveler speaks of one made of a single straw or fibre as fine as thread and as soft as silk. The woman who made it was engaged four months in the work, and it was valued at \$250.

A very gay corsage made of wide Roman sashes is worn by young ladies to brighten up skirts of white or black lace, and give variety to their toilets by having this extra bodice to change with the lace basque that belongs to the skirts. This is a tight-fitting round waist with V neck, made of the sushes arranged with the stripes going across. The sleves are of lace to suit the skirts, and there is a full sash and black irapery in the pretty Roman coloring; the pale sashes with blue, pink and white bars are worn by blondes, while those who are darker choose the deeper colors with brighter red, green and black stripes.

A boy Makes Pickles.

A boy whom we know of makes quite a nice sum of money every year by raising a patch of cucumbers for pickles. The month of July is not yet too late to plant them. Besides the cucumbers, he has a chicken house, which he built himself. We told you about that once before. He has since got some full-blooded brown Leghorn fowls, which he is very proud of. They have given a large number of eggs. red, green and black stripes.

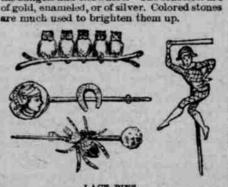

Here as elsewhere, the taste is for the fanciful and the grotesque. The bizarre is in demand quite as much as the beautiful. The neck slides or buckles which created such a craze abroad last winter, are introduced this season by our own manufacturers in a bewildering number of designs, and promise to have an immense patronage throughout the entire country. It is very safe to say these neck slides will be exceedingly fashionable this summer to wear with ingly fashionable this summer to wear with iresses cut low enough to expose the neck vervet ribbon of any desired bue, and presents the appearance, as the name indicates, of a buckle or slide. Originally these ornaments were veritable buckles, but the newest productions are made with pins, so that the trinket can readily be transferred from a neck ornament to a bonnet pin. The pret-tiest styles are those made of small dia-monds, pearls, turquoise and other stones, set so as to show almost-no gold at all. Then there are all gold neck slides in pretty pat-terns. In many instances, these ornaments lose all suggestion of the original buckle and sy or some fanciful design.

GENTLEMENS' RINGS. The newest styles in rings for gentlemen's wear are those which simulate two and three rings. The triple ring consists of two circlets of gold in two colors, the intermediate circlet being of platinum. The double rings show two circlets, one of yellow and one of red gold. Agem is embedded in each of the circlets. A very popular ring for gentlemen consists in a band of crude gold with a gem set low.

PRICE BAKING POWDER CO...

re, on the contrary, rather light, as far is weight of metal goes. But they are f exquisite and elaborate workmanship. les are worn as much as ever. Gree and Egyptian heads and designs appear upon the bang es and elsewhere. The bracelets are

We have selected a few of the most fanciful designs. These light, graceful pieces of jewelry have secure pins at the back, so that they may be fastened safe and tight. They are very attractive. The designs are infinite. Miniature swords, tomahawks, keys, rows of coins and four-leaved clover are some of the devices. One we observed appropriate the security of the devices. some of the devices. One we observed represented a crescent in repousse work, with a puppy's head looking over it.

Gentlemen's scarf pins follow the same grotesque fashions. We give a picture of

one of these, with a clown upon its head The baby, pleased with the glittering toy we ballet girls, owl's heads, beetles, etc. Live Flower Pots,

Here is something very pretty and inter-

EMPTY VASE. The one in the picture is as good as any. Even a common flower pot would do if the hole in the bottom was plugged up, so the water would not leak through. The vase or pot must be of the unglazed earthenware. This is very porous, and will let water readily soak through. Even a brick will absorb a large amount of moisture, you know. Plunge the vase into water all over, and let it soak twenty-four hours. Then all the pores will be full of water, from inside to out. Fill it with water, and cover it thickly all over the outside with fine

he is very proud of. They have given a large number of eggs.

Here is how this industrious boy makes his pickles. The cucumbers should not be larger than the finger. In salting them, put a layer of salt in the bottom of the cask; upon this put cucumbers and salt in alternate invers at the rate of three quarts of salt to a furble of cucumbers; add a little water to make brine, and weight the whole; the cucumbers should be covered with brine within twenty-four hours. In freshening, within twenty-four hours. In fresher place in a tub and cover with boiling water place in a tub and cover with county water once a day for three days, or until fresh. Then place in tubs and cover with vinegar. Add one teaspoonful of mixed spices to the gallon, and a little alum. They are worth from forty to sixty cents per hundred, ac-

W HEREAS, It appears by information received by me, that on or about the 10th day of April, 1885, one William Granberry, colored, sentenced to be hung on the 15th day of April, 1885, made his escape from the jail at Starkville, Oktibbeha county, and is still at large;

Now, therefore, I, ROBERT LOWRY, Governor of Mississippi, do offer the above reward for the arrest and delivery of the said William Granberry, colored, to the Sheriff of Oktibbeha county; said reward to be paid on delivery. And I do moreover, require all officers of this State to be diligent in their effects to arrest said fugitive escaped marderer. Here is an enigma so easy that you can guess some of the words the first time you look at them.

I am a word of 5 letters. I am a word of 5 letters.

My 4, 3, 5, is a boy's nickname.

My 2, 3, 1, is an old cloth.

My 5, 3, 1, school children play.

My 2, 3, 5, is a small quadruped.

My 5, 3, 4, is a tawny color.

My 5, 3, 2, is a sailor.

My 5, 3, 2, is a sailor.

wide lace sewed on to one end of the pillow case, and these ends are laced together with a silk cord or ribbon. The pillow under-neath is faced with bright silk, which is seen through the lace.

one Afe Molhis, who afterwards made his escape and is still at large;

Now, therefore, I, ROBERT LOWRY, Governor of Mississippi, do offer the above reward for the arrest and delivery of the said Afe Mathis to the Sheriff of Alcorn county—one-half of said reward to be paid on delivery and the other half conviction.

And I do moreover, require all officers of this State to be diligent in their efforts to arrest said murderer.

WHAT CAUSES DISEASE.

The accumulation of garbage about the premises which ferments and decays, is acknowledged to be a prolific generator of disease, likewise. The accumulation of undigested tood in the stomach ferments and decays, the gases arising therefrom poisons the blood and as a consequence disease of surious frem are generated. A few doses of Kaskine puts the digestive organs in order, cleans out the stomach, a perfect circulation of blood and perfect Digestion is obtained, and all liability of disease removed.

No person whose digestion is healthy need have any fear of Cholera or other Contagious Disease, and nothing will put the Digestive Organs in a healthy condition as quickly as Kaskine. Be sure is keep your stomach in good order by using Kaskine and you may laugh at contagion.

This valuable remedy is put up in a condensed form, and two to four bottles will cure the most obstinate case of habitual constitution.
